

# UPL Invest in Protecting Key Active Ingredients

The EU approval for the active substance ethofumesate has successfully been renewed in accordance with Regulation (EC) No 1107/2009.

UPL Europe Ltd's ethofumesate containing products, **OBLIX 500** (MAPP 16671), **EFECKT** (MAPP 17177), **OBLIX MT** (MAPP 16487), **VOLCANO** (MAPP 16532) and **XERTON** (MAPP 17335) are currently undergoing renewal in accordance with Article 43 of Regulation (EC) No 1107/2009.

The outcomes of the evaluation by the Zonal Rapporteur Member State and HSE in the UK are still pending.

**At this stage of the evaluation we are confident of continued authorisation for our supported ethofumesate containing products in the UK.**

The authorisations for UPL's supported products will remain in place until a regulatory decision is taken on the product renewal submissions.

UPL is continuing to invest in developing ethofumesate, including recently gaining approval for their wheat herbicide, **XERTON**.

UPL is also investing in maintaining other current active ingredients in addition to developing new products.

If you would like any further information about UPL Europe Ltd, ethofumesate or any of our other products, then please visit our website: [uk.uplonline.com](http://uk.uplonline.com) or please get in touch.
